

Digital footwear design for a sustainable development

Take the first steps toward the digital transformation. The footwear design and development can be done in a more sustainable and smart way.

Work collaboratively, support the environment

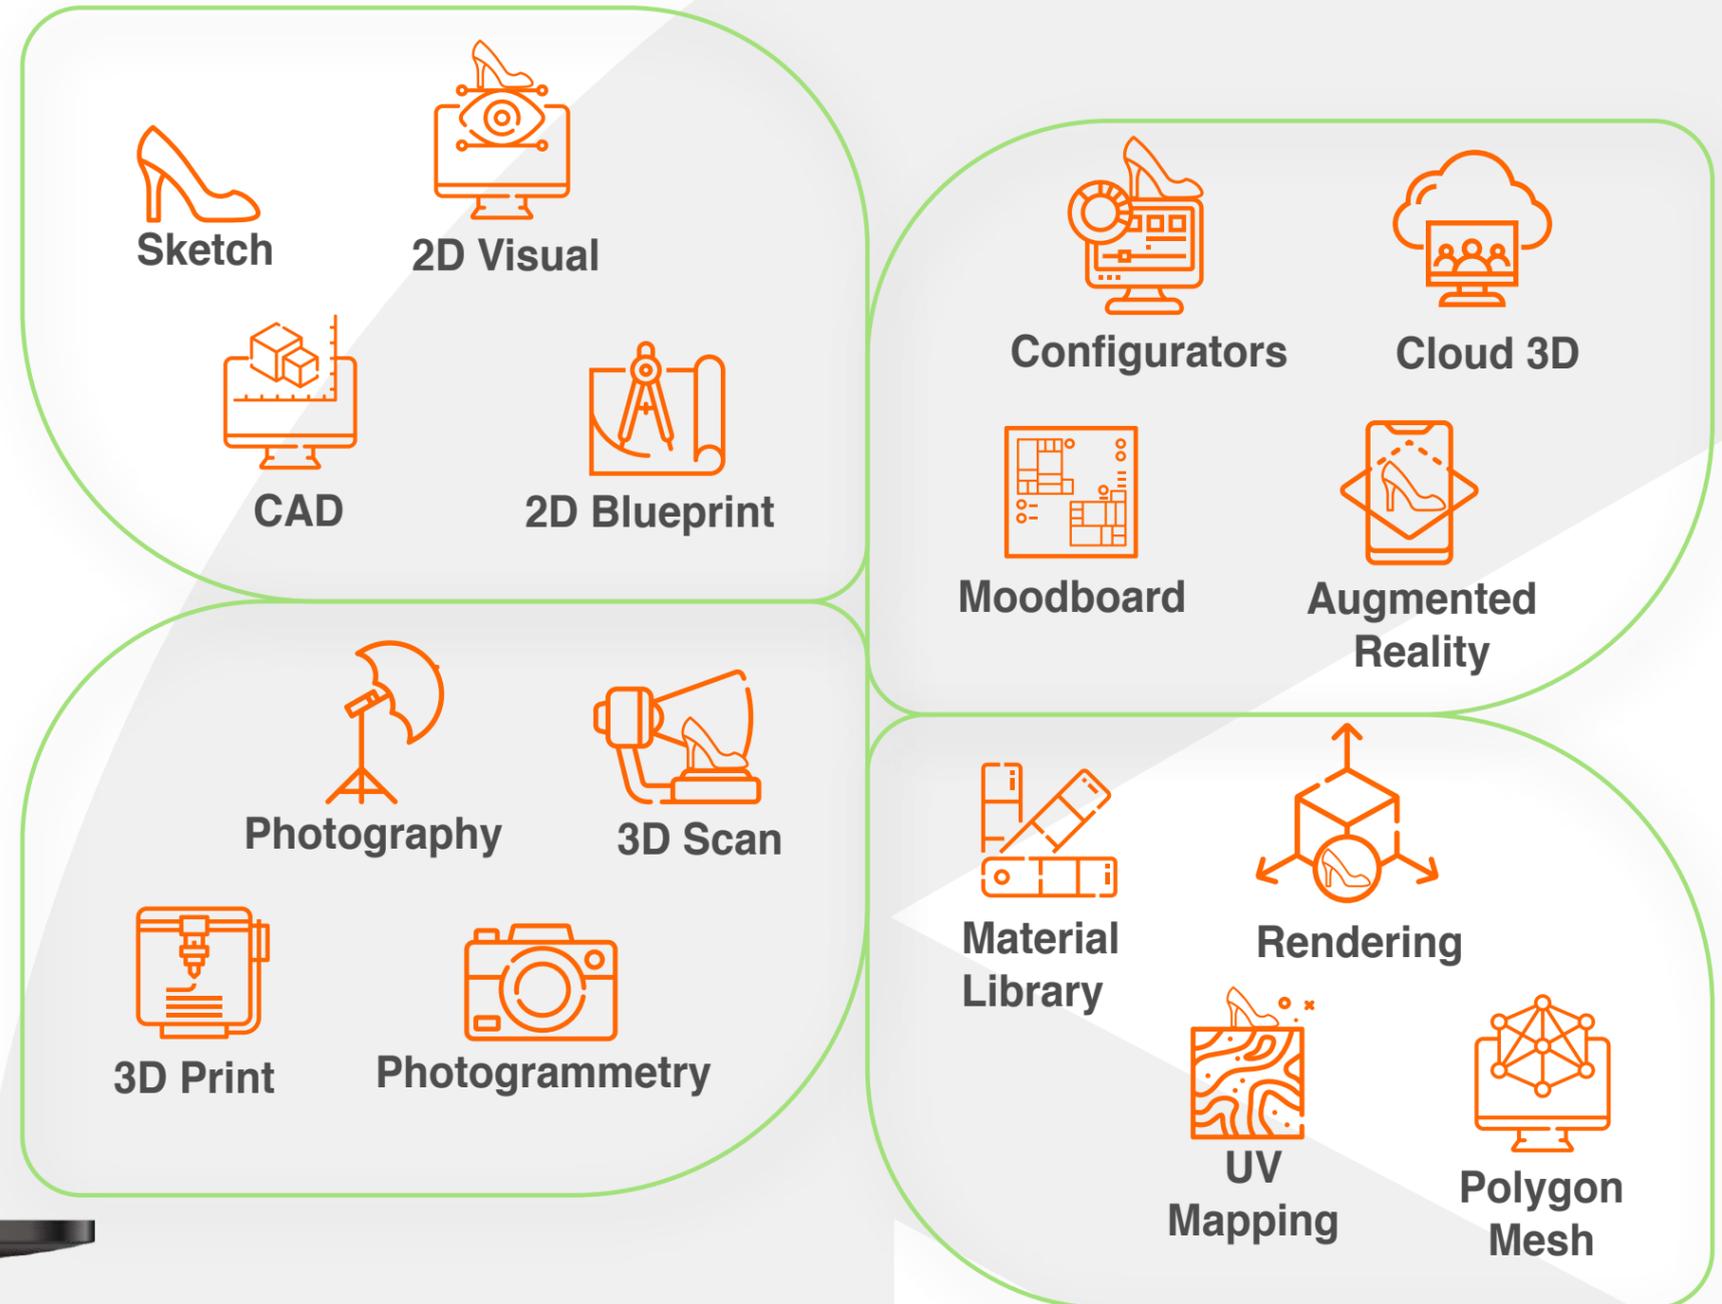

- Dynamic Factor in cooperation with Sketchfab presents a roadmap and platform to support the footwear design digitalization.
- Create virtual samples, explore different materials and colors possibilities without waste or residuals.
- Visualize assets using a 3D viewer that works in any device and it is augmented reality ready.

- Work in collaborative way sharing assets between designers and retail planners.

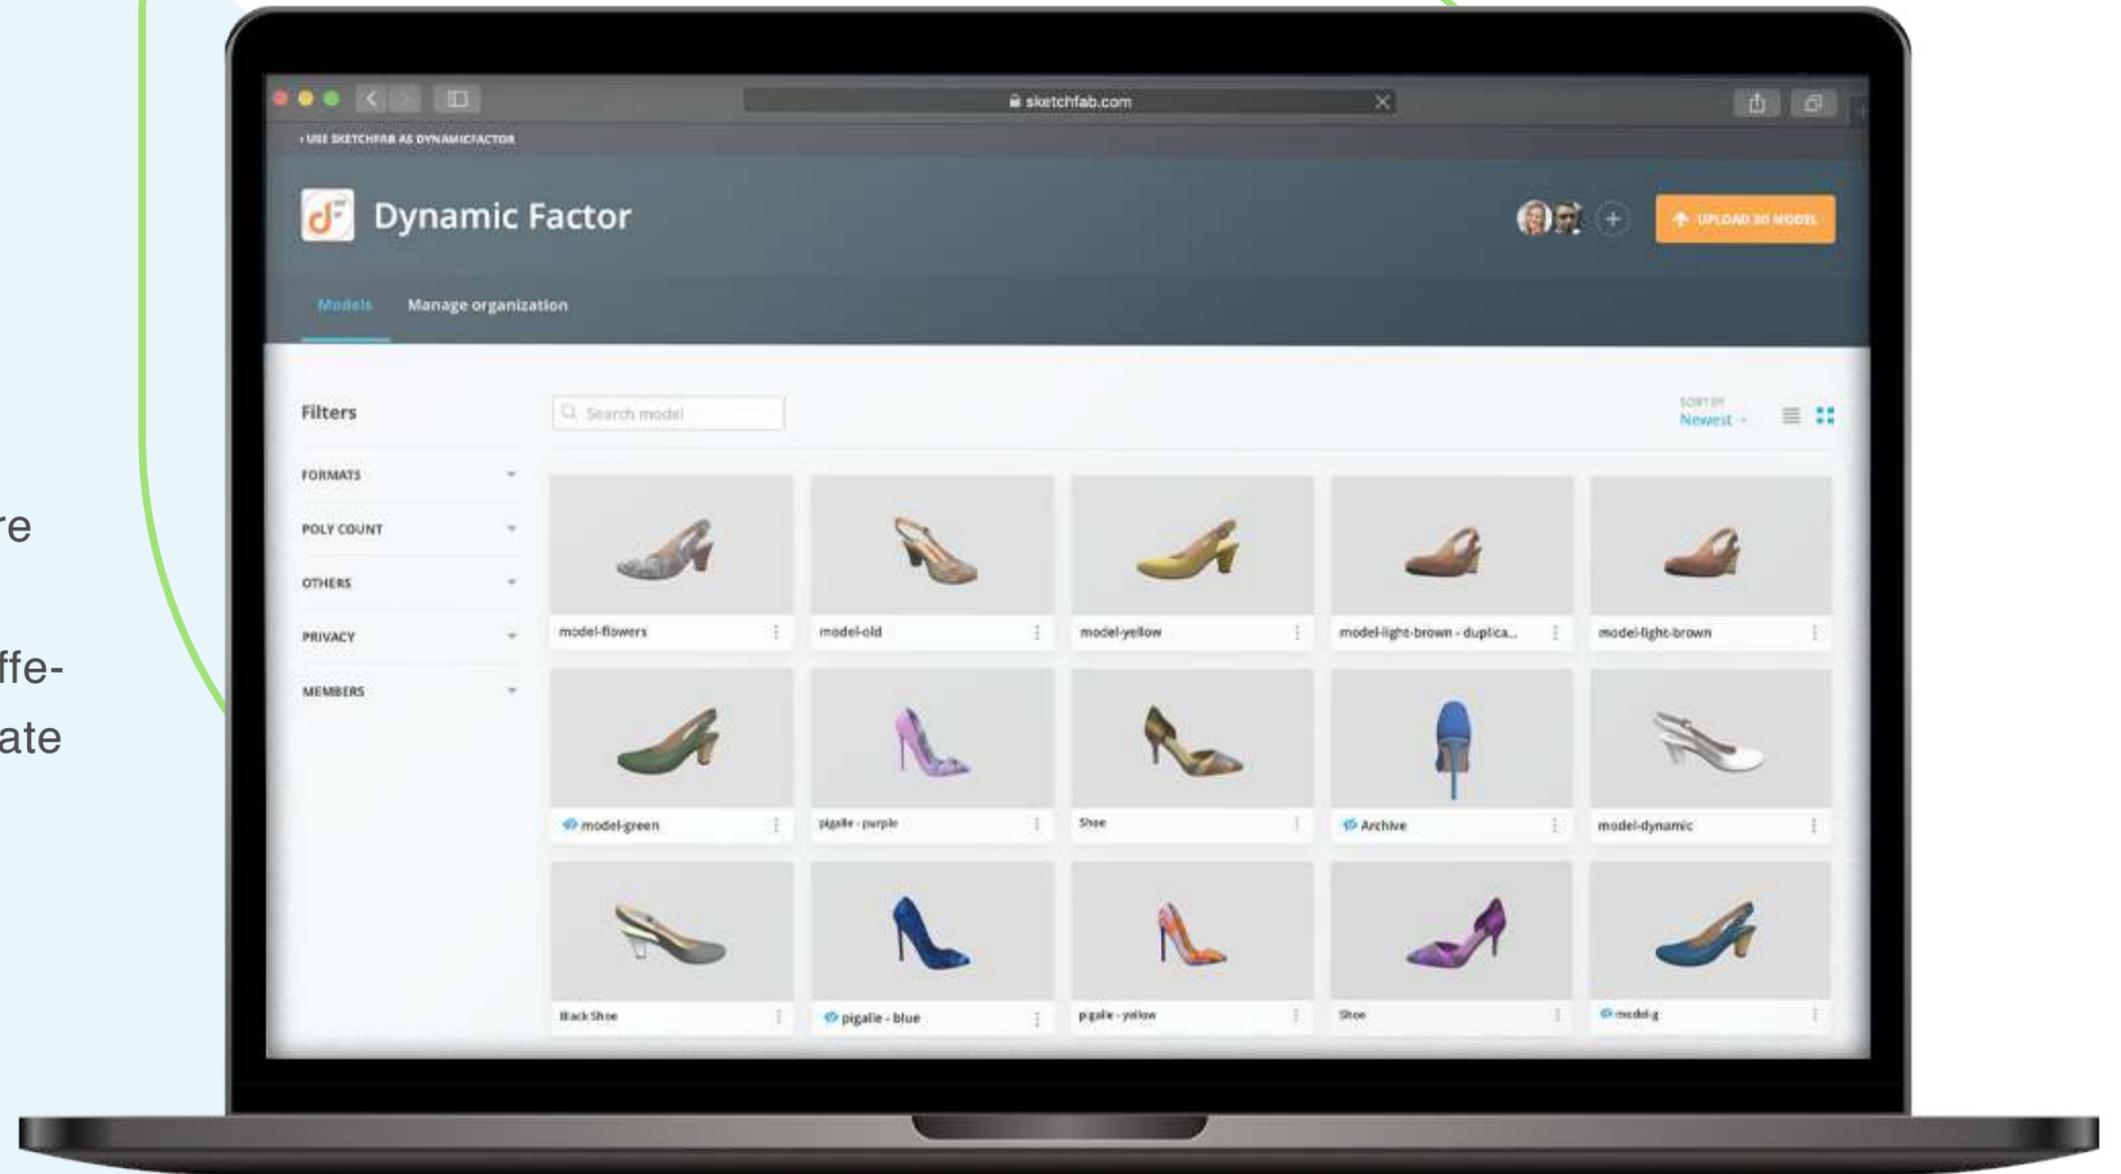

The roadmap for digital footwear design

- From sketch to fully rendered. The roadmap, shortcuts, tools, equipments and guidelines to digitalize assets no matter process stage or business size.

Sketchfab for teams

- The leading platform to publish, share and integrate interactive 3D content anywhere on the web, now allows different users to contribute and collaborate on the same team.

Configurators

for shoes

- Adjust colors and materials for different components. Explore customized combinations from all angles, from up close or far away. The web-based and entirely cross-platform shoe configurator runs on any device, browser or operating system.

Collaborate in a powerful 3D editor with rendering support

Works on
Any Device
and Browser

VR & AR ready

Work collaboratively

All your assets organized in one place
Share a full-range of design with your entire product team

Physically based
Rendering

Adjust lighting, materials, filters and other rendering settings

Highly
Customizable

Inspect a model's geometry, topology, materials, textures and more.
Enable or disable post-processing filters

3D annotations

Discuss model details with your team
Comment on your models using 3D annotations

Embeddable
Anywhere

Configurators

Privacy and security

- Chose privacy settings for each upload
- Data is always encrypted at rest and in transit
- The platform undergoes regular security audits. 2020 Audit session score: 4.5/5 Very good by Vaadata
- Distributed cloud architecture accommodates high traffic

Join the digital transformation for a more sustainable development

- Modernization with cutting-edge technologies, digital assets, collaborative work...
The benefits switching to digital are not only expressed in efficiency terms, but significant for the environment.
- Having questions or want to discuss your ideas? We're here to help.
